

J – Self-priming centrifugal pumps

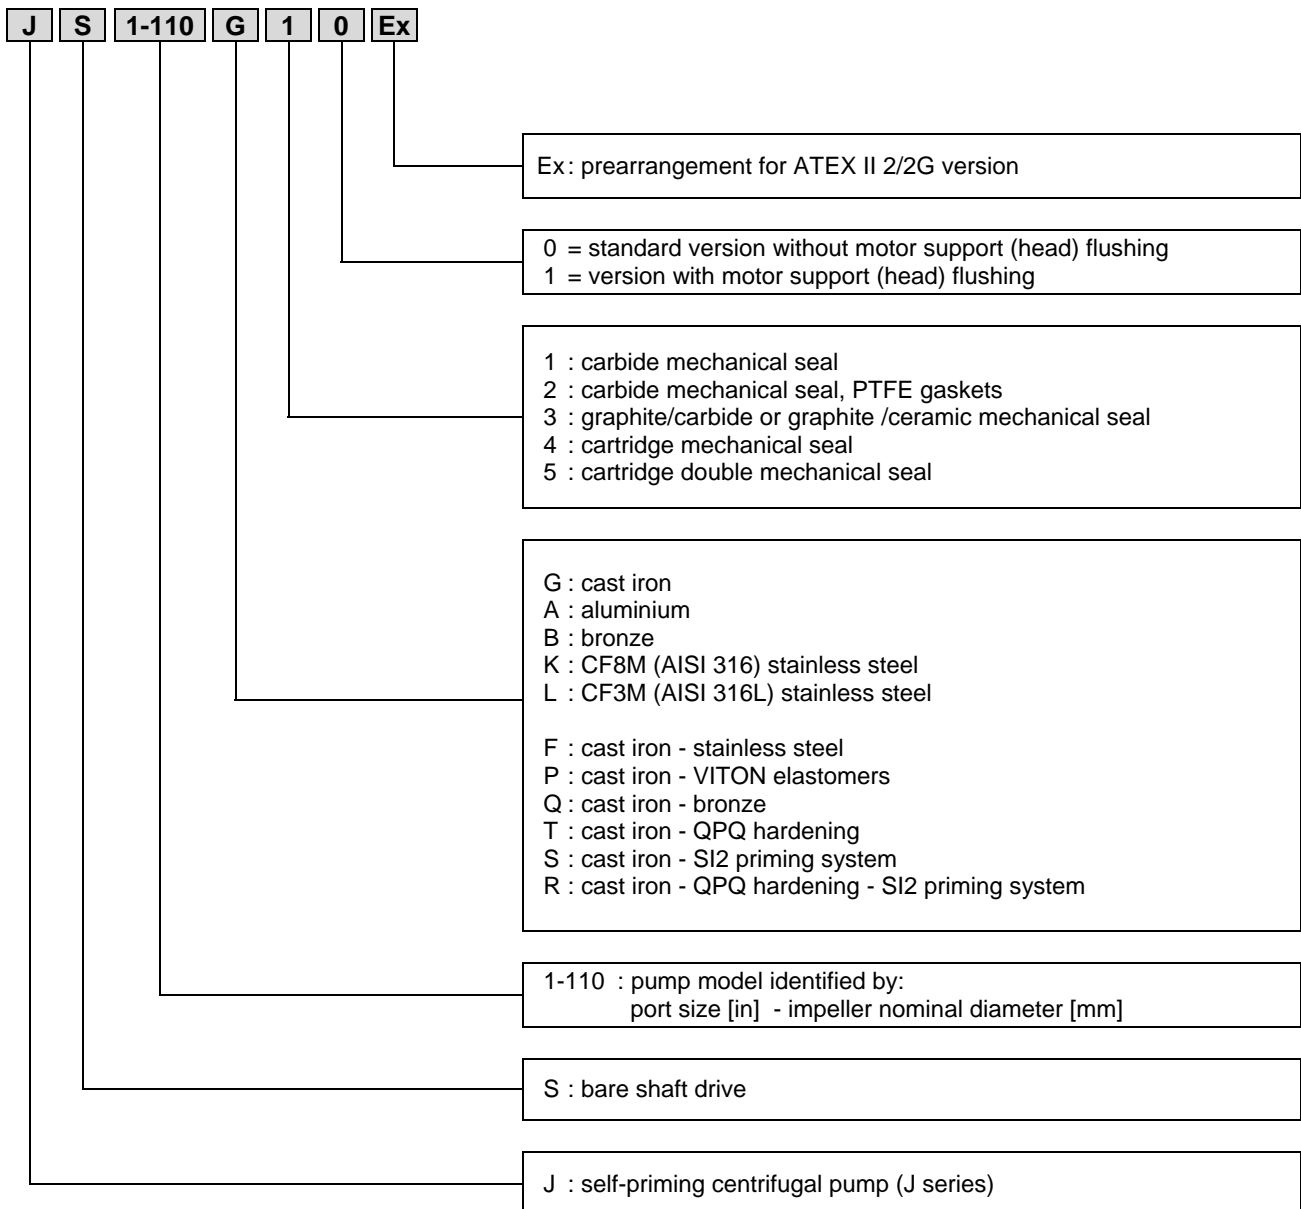

PRODUCT IDENTIFICATION

Execution and Arrangement

JS - Bare shaft pumps - J series

PRODUCT IDENTIFICATION

Example: **JS 1-110 G10 Ex**

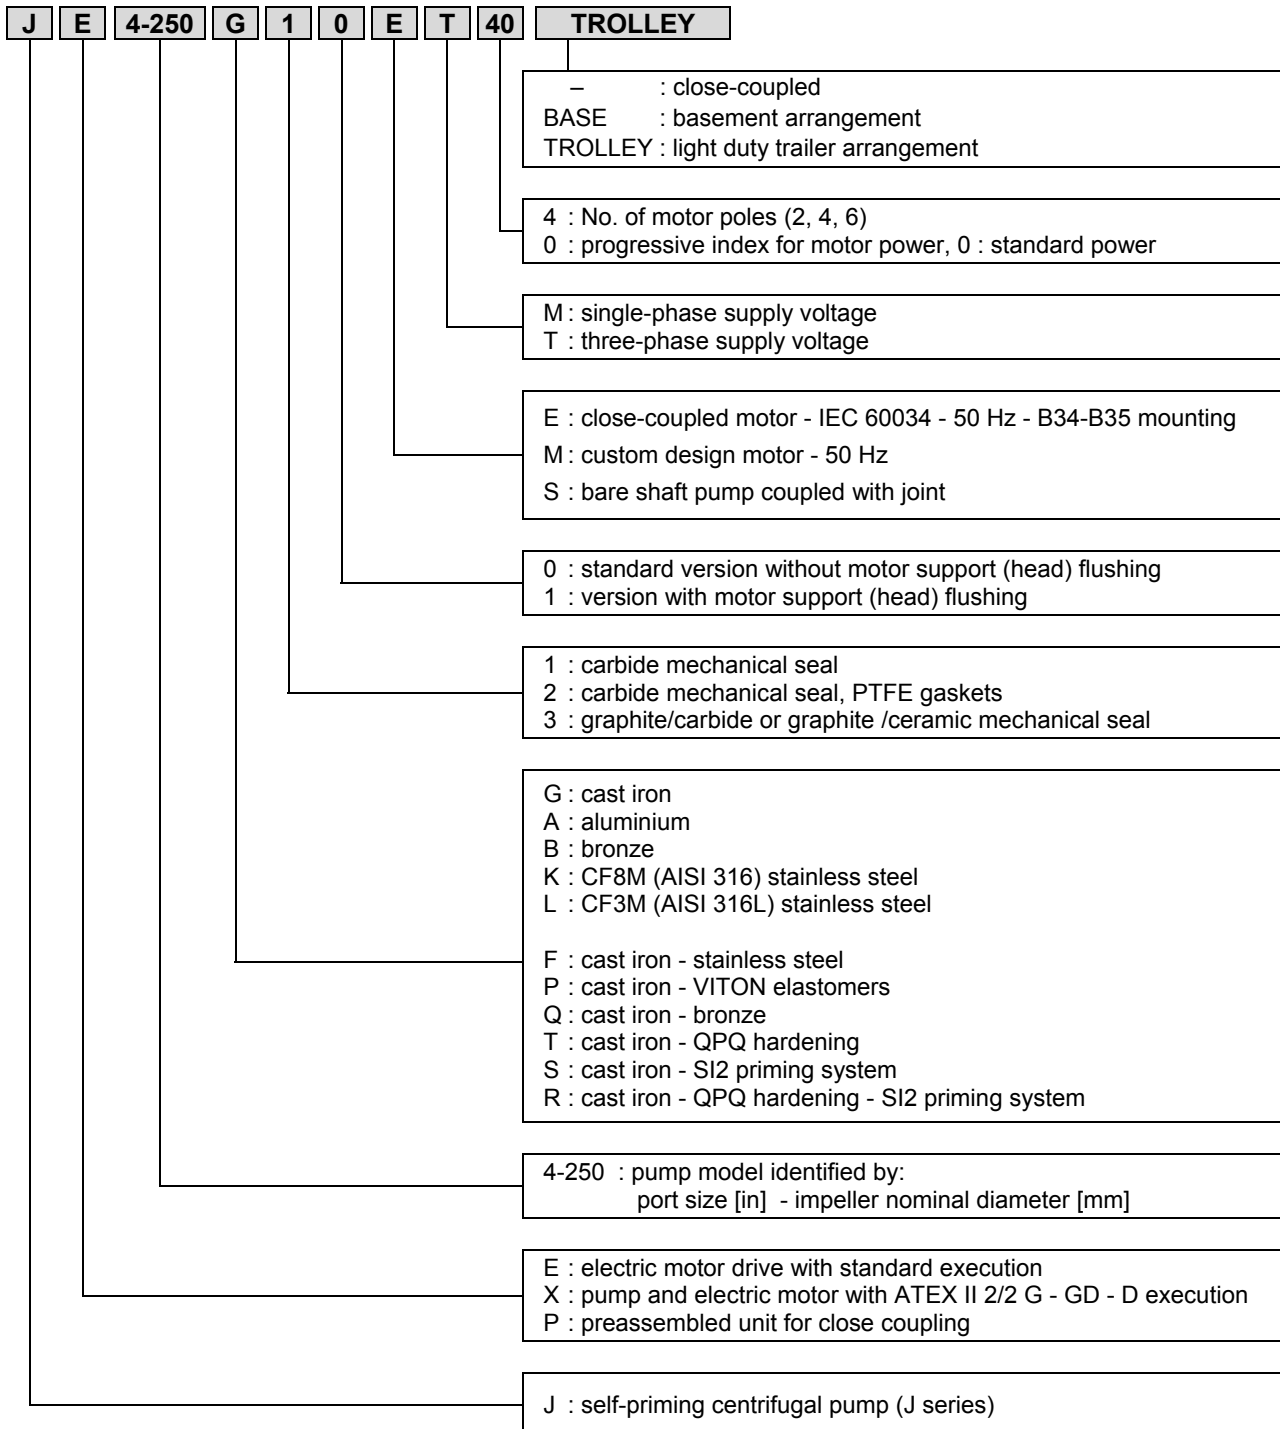

P.S.: the product description is composed of the items listed above, but the combinations available in the catalogue are only those provided in the "Executions range" and in the price list. Any other variation can be considered a "special product" and the request need to be submitted for feasibility evaluation.

JE – New electrically driven pumps – J series

PRODUCT IDENTIFICATION

Standard motor

Example: JE 4-250 G10 ET40 TROLLEY

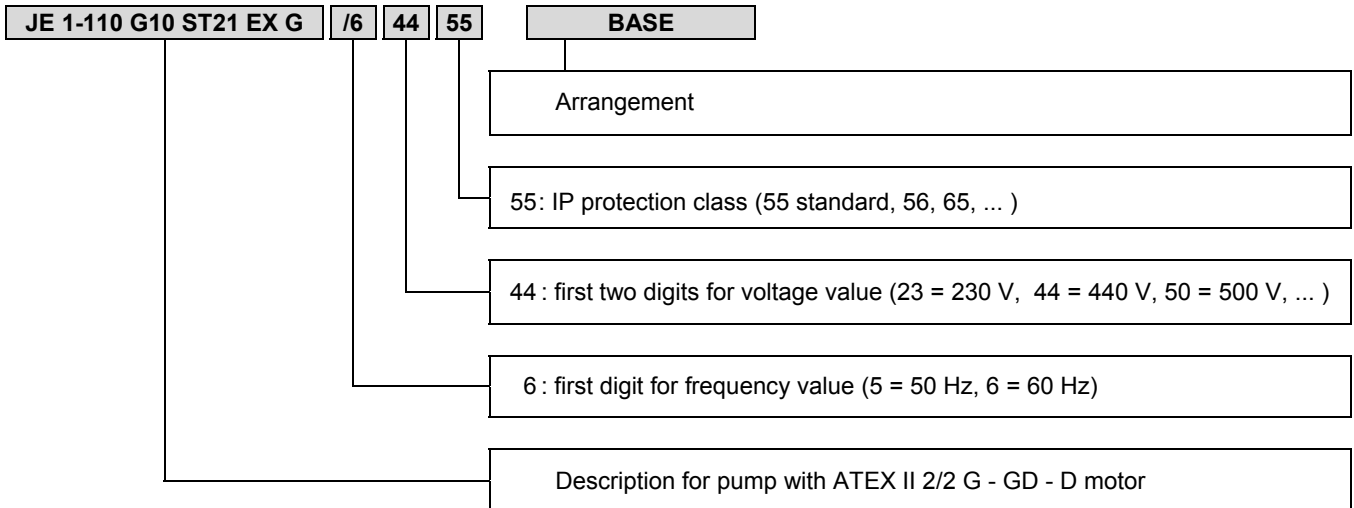

P.S.: the product description is composed of the items listed above, but the combinations available in the catalogue are only those provided in the "Executions range" and in the price list. Any other variation can be considered a "special product" and the request need to be submitted for feasibility evaluation.

Special motor

- frequency
- voltage
- protection degree

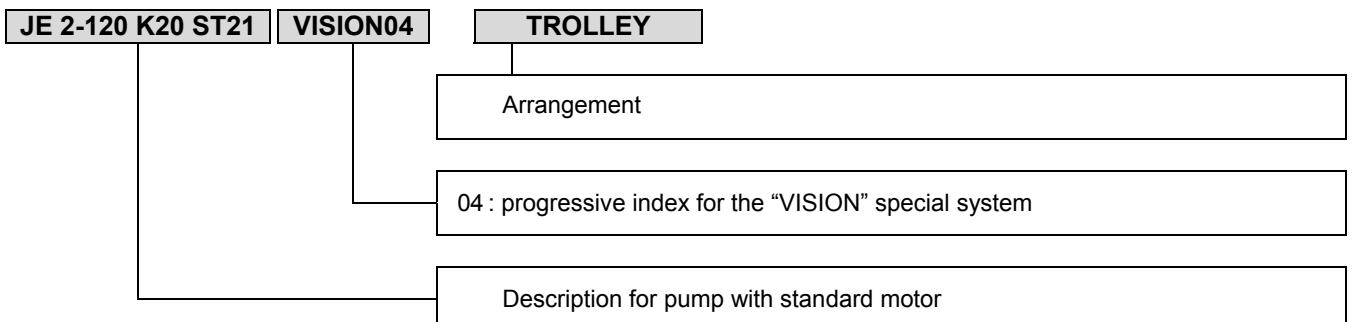

Example: **JE 1-110 G10 ST21 EX G /64455 BASE**

“VISION” **special system** for which are defined the characteristics of motor, pump, arrangement, components, accessories, etc... :

- frequency
- voltage
- protection degree
- efficiency class
- sensors: thermistor PTC, PT100, ...
- forced ventilation
- testing and type approval according RINA standards, CSA standards, ...
- make of motor manufacturer: SIEMENS, BROOK, ABB, ...
- control panel and wiring
- execution
- arrangement
- version

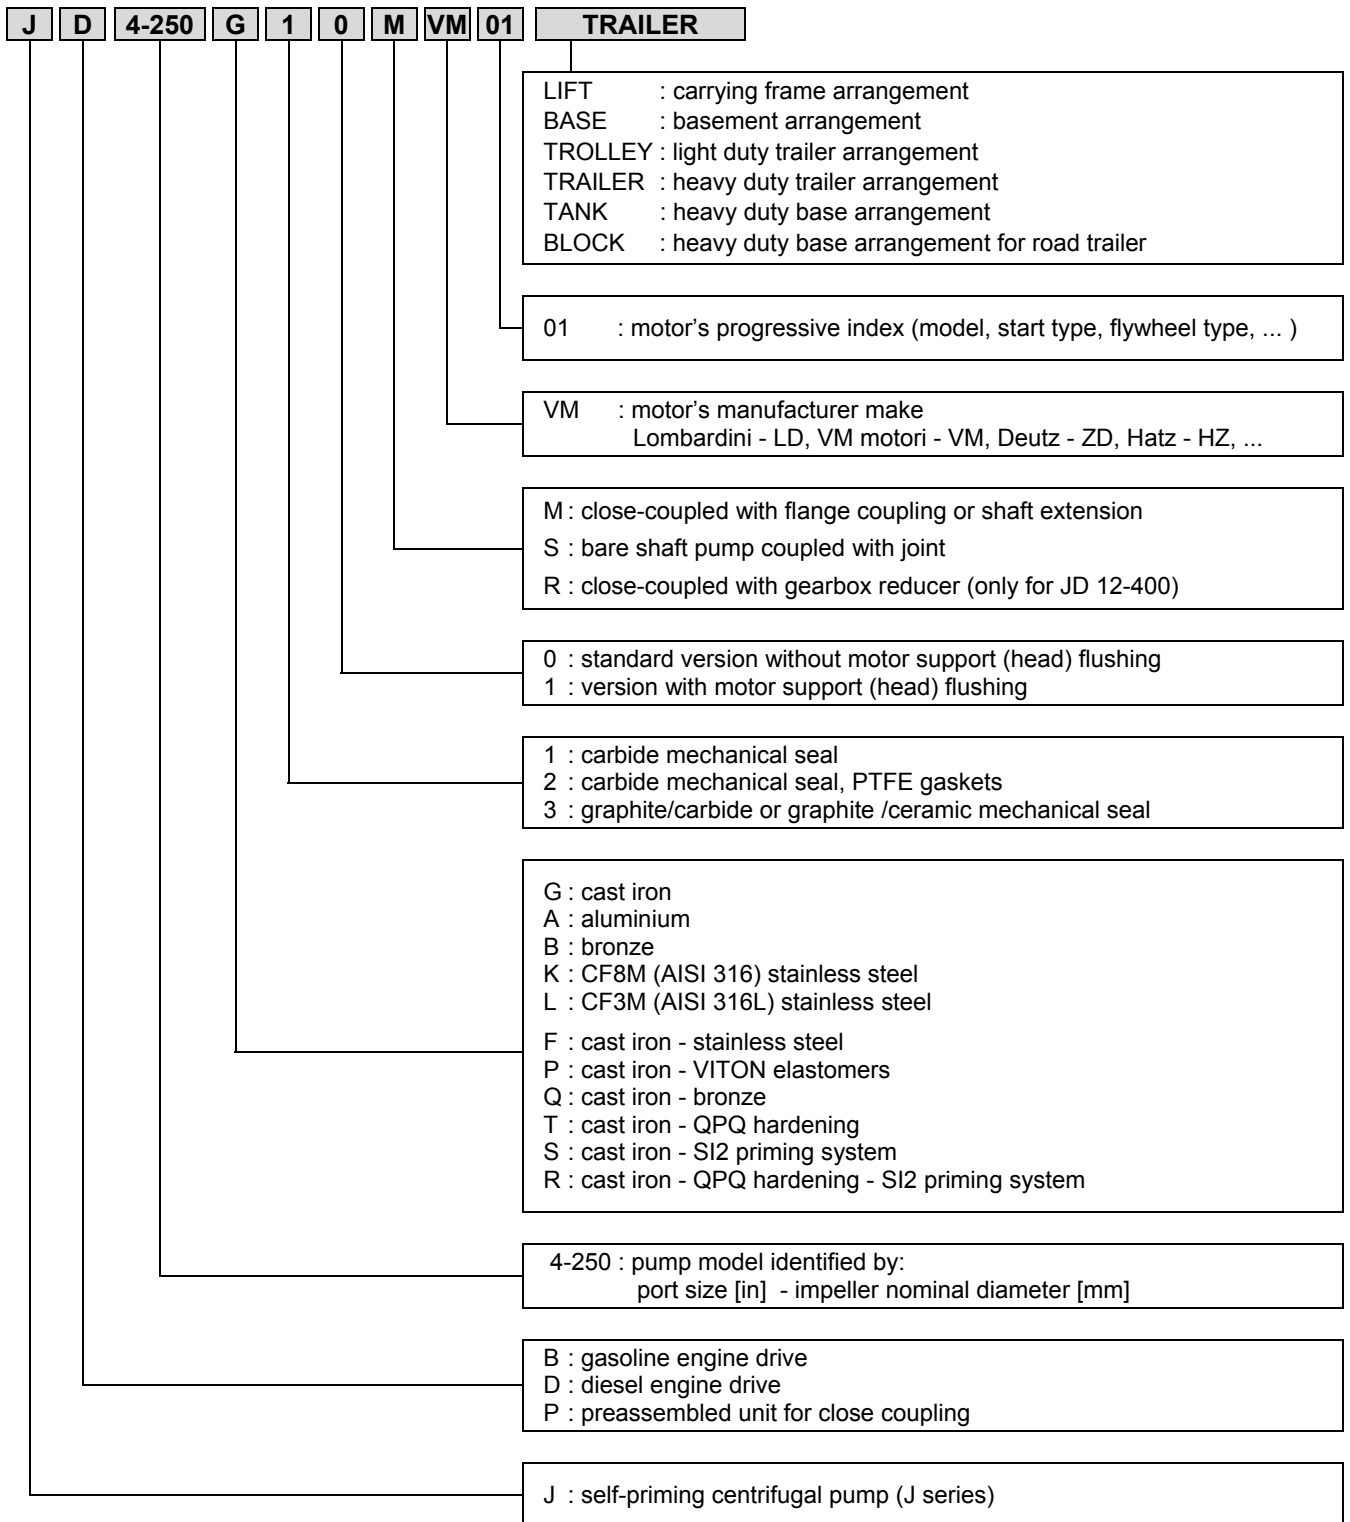

Example: **JE 2-120 K20 ST21 VISION04 TROLLEY**

JB-JD – New engine driven pumps – J series

PRODUCT IDENTIFICATION

Example: **JD 4-250 G10 MVM01 TRAILER**

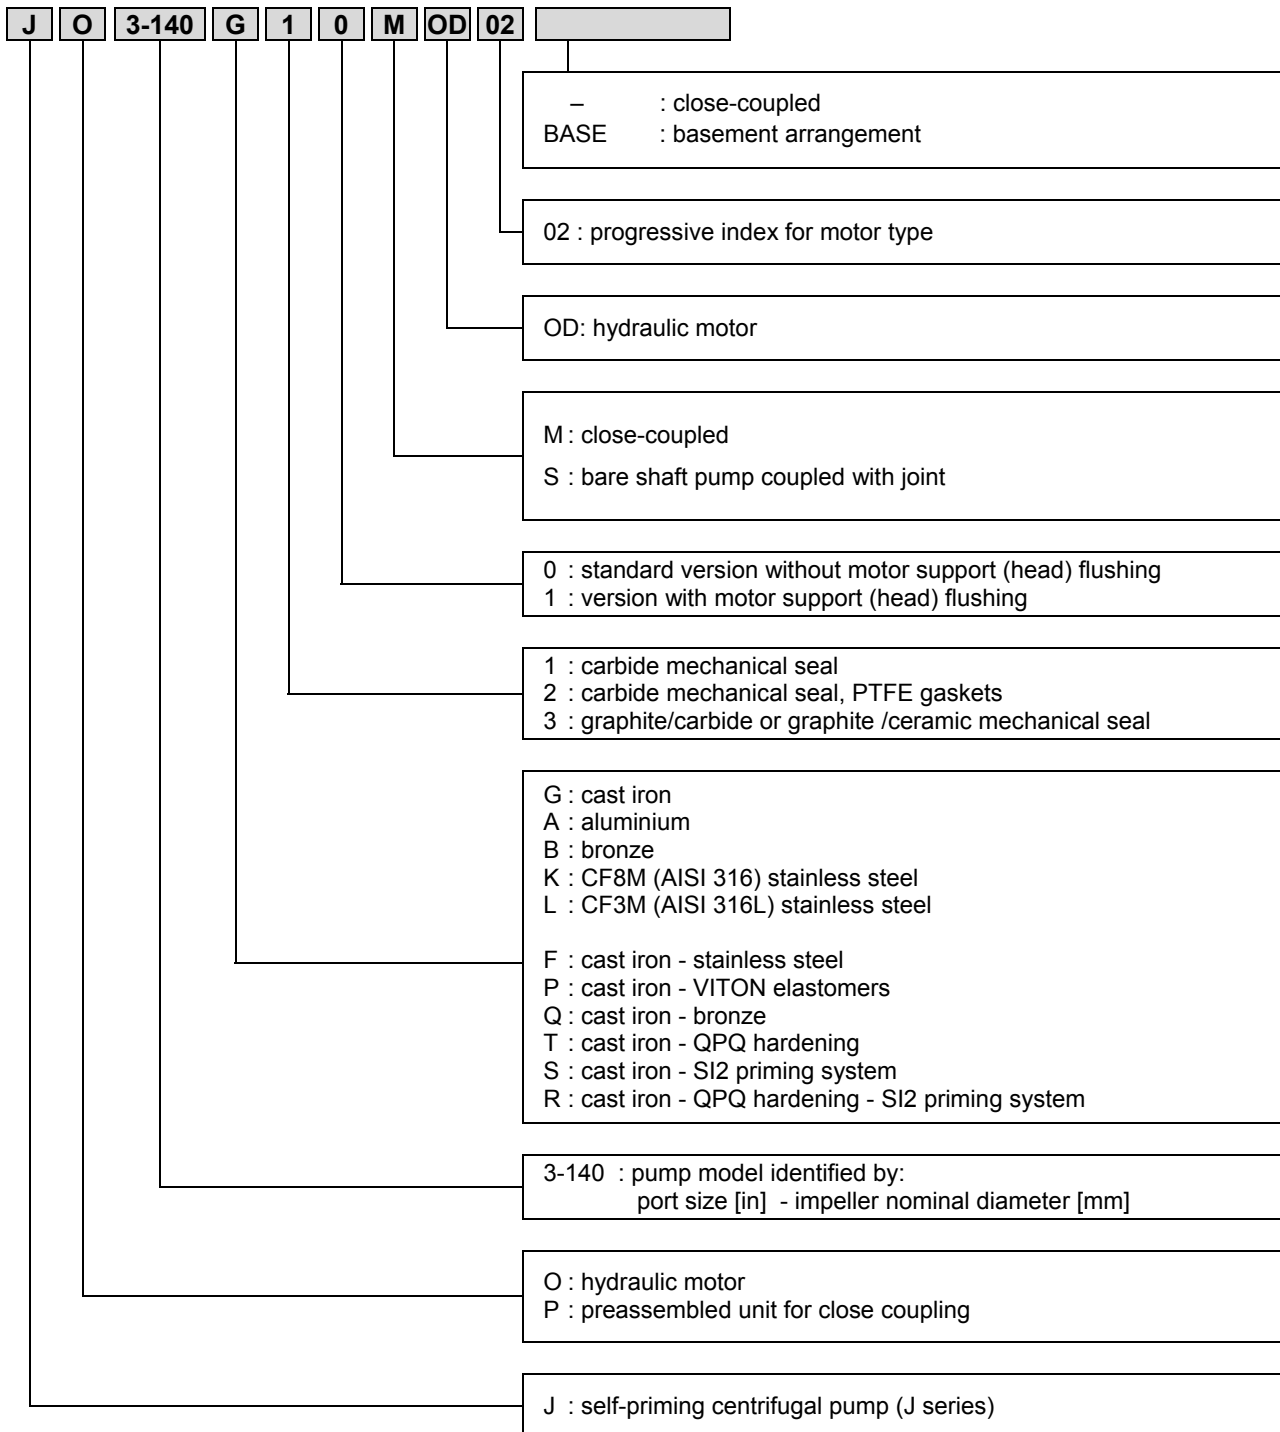

P.S.: the product description is composed of the items listed above, but the combinations available in the catalogue are only those provided in the "Executions range" and in the price list. Any other variation can be considered a "special product" and the request need to be submitted for feasibility evaluation.

JO – New hydraulic motor driven pumps – J series

PRODUCT IDENTIFICATION

Example: **JO 3-140 G10 MOD02**

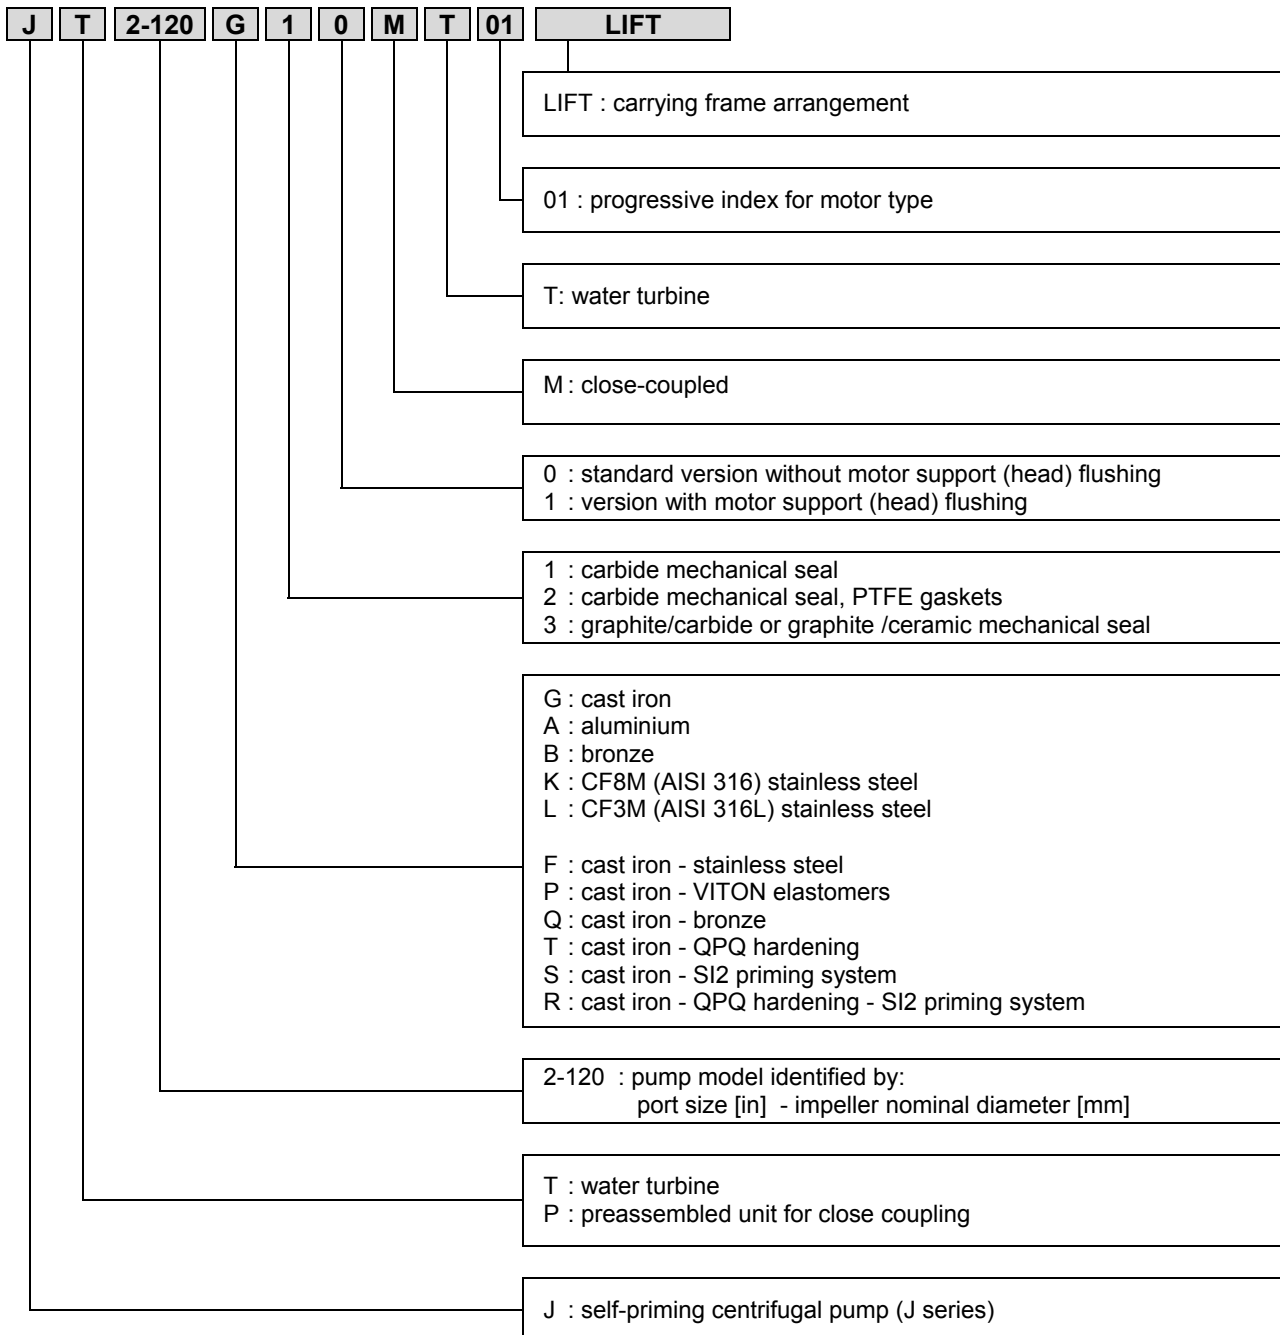

P.S.: the product description is composed of the items listed above, but the combinations available in the catalogue are only those provided in the "Executions range" and in the price list. Any other variation can be considered a "special product" and the request need to be submitted for feasibility evaluation.

JT – New water turbine driven pumps – J series

PRODUCT IDENTIFICATION

Example: **JT 2-120 G10 MT01 LIFT**

P.S.: the product description is composed of the items listed above, but the combinations available in the catalogue are only those provided in the "Executions range" and in the price list. Any other variation can be considered a "special product" and the request need to be submitted for feasibility evaluation.
